

Company Package for CASPS

Who Does it Protect?

At its core, our package policy provides the MiCAR-mandated regulatory coverage every Crypto-Asset Service Provider (CASP) needs to meet prudential requirements. This ensures your business complies with regulatory obligations while protecting your leadership and clients' assets from the risks that matter most.

Whether you're a leading exchange or an emerging challenger, Cryp-Sure safeguards your operations and executives, giving you confidence that the people and systems driving your business are fully covered.

Built as a comprehensive business package, all additional coverages are designed around this core. This makes compliance simple, streamlines operations, and allows you to focus on growth and innovation, knowing Cryp-Sure is there every step of the way.

Key Coverages

Our core protection ensures CASPs meet MiCAR prudential requirements while safeguarding your business:

- **Client Asset Protection:** Coverage for losses of client funds or crypto-assets due to operational errors or system failures.
- **Professional Indemnity (PI):** Protects against claims of negligence, errors, or breaches of duty in the provision of your services.
- **Cyber Risk:** Coverage for data breaches, system hacks, and technology failures impacting clients.
- **Regulatory and Compliance Costs:** Defence and investigation costs arising from MiCAR and other crypto-specific regulatory inquiries.

Package Extensions Available

Cryp-Sure goes beyond core protection with optional extensions designed to meet the full spectrum of CASP risks:

- **Property:** Covers physical assets, offices, and infrastructure critical to your operations.
- **Group Personal Accident:** Protection for your team in the event of injury or accident.
- **Employers' Liability:** Safeguards against claims from employees for workplace injury or illness.
- **Public Liability:** Covers claims from third parties for injury or property damage caused by your business activities.
- **Crypto-Specific Enhancements:** From custody governance lapses to tokenization and stablecoin reserve management, these bespoke add-ons ensure coverage aligns with your evolving business model.

With Cryp-Sure, you can build a protection package that's flexible, comprehensive, and fully tailored to your business.

More Than Just insurance

At Cry-Sure, we're more than an insurer — we're your partner in navigating the emerging crypto regulatory landscape. The MiCAR Package combines mandatory regulatory protection with tailored business coverage, giving CASPs the confidence to operate, innovate, and grow without tying up capital.

Our approach ensures that leadership, operations, and client assets are safeguarded through all stages of business development. With access to specialist advice, regulatory insight, and practical support, your team can focus on building your business with confidence.

Cryp-Sure goes beyond coverage — we provide guidance, resilience, and proactive support, helping your business thrive in a rapidly evolving digital asset ecosystem.
